

CONFIDENTIAL PROPOSAL

AXONIC S.R.L.

# The Closer Node

AI-Powered Client Acquisition Platform

AUTONOMOUS AI INFRASTRUCTURE

JUNE 2026

## — About Axonic S.R.

Axonic S.R. is an enterprise AI infrastructure firm specializing in autonomous client acquisition systems. We build sovereign AI-powered platforms that eliminate manual outbound work, replacing templates and guesswork with intelligence-driven prospecting and proposal generation.

Our core philosophy: decouple time from revenue. Every tool we build lets professionals and organizations focus on delivery while our AI handles the entire client acquisition pipeline.

## — What Is The Closer Node?

The Closer Node is an AI-powered platform designed to automate how professionals and teams win high-value clients. Unlike CRM tools that just track leads, The Closer Node actively generates strategic, personalized proposals and orchestrates multi-stage outreach campaigns calibrated to each prospect's specific context and industry.

Input your prospect's details. In 60 seconds, receive a ready-to-use strategic proposal and an intelligent follow-up sequence designed to move decisions forward. No templates. No guesswork. Just results.

## Two Products, One Platform

### THE SOLO ARCHITECT

For independent consultants, freelancers, and individual professionals who need high-conversion proposals in seconds.

- Enter prospect details and your offering (4 fields)
- AI generates a strategic proposal in under 60 seconds
- Includes subject line, full body, and follow-up draft
- Copy to clipboard or open directly in email
- Usage tracking with rollover on renewal

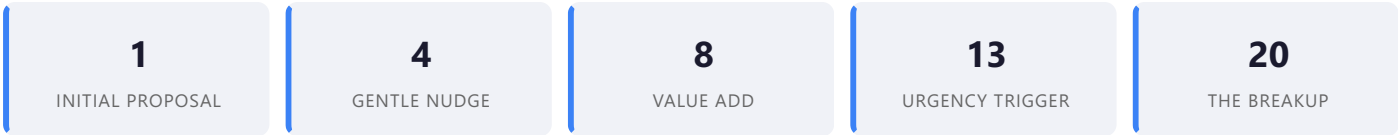

### THE ENTERPRISE ENGINE

For B2B teams, agencies, and organizations needing full campaign orchestration across multiple touchpoints.

- Input target company, industry, and pain points
- Optional website scrape for deep personalization
- Generates complete 5-stage outreach campaign
- Campaign archive with stage tracking
- 11 industry-specific tone profiles

## The 5-Stage Outreach Sequence

A proven conversion architecture used by the Enterprise Engine:

## — Features & Capabilities

### AI Proposal Generation

Strategic, personalized proposals generated in 60 seconds using Groq LLM (llama-3.3-70b). Each proposal is unique and context-aware.

### 5-Stage Outreach Automation

Full campaign orchestration from initial contact to polite breakup. Each stage timed and calibrated to maximize conversion probability.

### Target Intelligence

Built-in web scraper extracts prospect company data, business model, and potential pain points for hyper-personalized outreach.

### Market Positioning Analysis

Free tool that analyzes service offerings and recommends optimal pricing and positioning strategy for maximum market impact.

### Industry Tone Calibration

11 industry-specific tone profiles ensure every communication matches the prospect's language and expectations.

### Secure Supabase Backend

Row-level security, encrypted data at rest and in transit. Your data stays in your instance with no third-party sharing.

## — Why Choose The Closer Node

**01**

### Eliminates Manual Work

No more writing proposals from scratch. The AI handles the entire outreach pipeline end-to-end.

**02**

### Conversion-Optimized

5-stage sequence based on proven sales psychology. Each touchpoint maximizes response probability.

**03**

### No Vendor Lock-In

Sovereign infrastructure. Your data, your control. Transparent pricing with no hidden fees.

## Pricing Plans

Choose the tier that matches your needs. All plans include secure authentication and encrypted storage.

| TIER               | PRICE   | PERIOD   | INCLUDES                                     |
|--------------------|---------|----------|----------------------------------------------|
